Mini Pipe Plugs

- Mini Pipe Plugs 1,5 and 2,5 bar
- Mini Test Plugs 1,5 and 2,5 bar
- Mini Pipe Plugs short version
- High pressure Pipe Plugs
- House connection sewer test sets
- Accessories

LAMPE Mini Pipe Plugs are manufactured from high quality special rubber with a fabric reinforcement. They are a low cost alternative for pipe shutoffs and pressure testing in small circular diameters up to 600mm.

LAMPE Mini Pipe Plugs are available as pure pipe plugs for closing a sewer pipe temporary and as test plugs with bypass for pressure tests with water or air.

Our standard delivery program includes pipe plugs and test plugs up to 600mm in various versions: 1,5 bar for 5m water head, 2,5 bar for 10m water head, special short pipe plugs, high pressure pipe plugs and complete testing sets for house connection sewers.

For larger diameters and special profiles we recommend our Sewer Sealing Cushions with double cone, because of the many and unique advantages such as handling, flexibility and lifetime. (See our catalogue LAMPE Sewer Sealing Cushions).

Mini Pipe Plugs 1,5 bar

Back pressure: 5m water head (0,5 bar water) 0,2 bar air or vacuum

Art.- No.	Article	Pipe diameter		Weight, kg	Total length, mm	Diameter, empty, mm
		mm	inch
